Summary

I am a second-year **Software Engineering** student at the **University of Sindh**, Jamshoro. Alongside my degree, I am pursuing a specialized **Web and App Development** course at **Saylani Mass IT Training (SMIT)** to enhance my technical expertise in modern web technologies

Education

University of Sindh Software Engineering	Bachelor of Engineering • 3.00 Jamshoro, Pakistan • 2025 - Present
Saylani Mass IT Training (SMIT) Web and App Development	Certification Hyderabad • July 2025 - Present

Learning MERN Stack development, including HTML5, CSS3, JavaScript (ES6+), React.js, and Node.js. Working on various projects to build scalable web applications.

Experience

DeveloperHub Corporation Intern	Remote 1 Month
- Developed responsive and user-friendly web interfaces using React.js and Tailwind CSS. - Collaborated with the development team to write clean, maintainable code and optimize frontend performance. - Gained hands-on experience in modern web technologies and applied them to real-world projects.	
Arch Technologies Intern	Remote 1 Month
- Developed a personal Portfolio Website to showcase projects and technical skills using modern web standards. - Built a functional To-Do List application with features for task management and data persistence. - Practiced core web development concepts including DOM manipulation and responsive design during the internship.	

Projects

Spotify Clone - Full-Stack Music Streaming Platform

- Built a fully functional music streaming web application using **Next.js** and **Tailwind CSS** to deliver a responsive and premium user experience.
- Integrated **Supabase** for backend operations to handle secure OTP-based user authentication and manage the dynamic song database.
- Implemented a custom audio player and real-time media streaming functionality utilizing **Supabase Storage Buckets** for seamless song playback.

Full-Stack School Management Portal

- Architected and developed** a full-stack CRUD web application utilizing an MVC (Model-View-Controller) backend pattern to manage dynamic student enrollment records.

- **Built RESTful APIs** using Node.js and Express to handle asynchronous POST, GET, and DELETE requests, integrated with a schema-based MongoDB database.

Designed a responsive frontend using Next.js (App Router) and Tailwind CSS, implementing native client-side fetch and React state hooks (useState, useEffect) for instant, seamless UI updates without page reloads.

Dvago Clone - Full-Stack E-Commerce Platform

- Built a complete e-commerce web application using **Next.js** and **Tailwind CSS** to deliver a fast and responsive user experience.
 - Integrated **Supabase** for backend operations to handle secure user authentication and manage the live product database.
 - Implemented a dynamic shopping cart and real-time product search functionality using **React Context API** for smooth state management.
- <https://dvago-clone-by-ab-raheem.vercel.app/>

Live Currency Converter

- Developed a real-time web application that fetches live exchange rates using the **Fetch API** and asynchronous **JavaScript**.
- Designed a responsive user interface with **HTML5** and **CSS** to ensure a seamless experience across different devices.
- Deployed the project on **Netlify** to maintain a live, accessible version for portfolio demonstrations.
